AquaCon Plus

General Product Features

AquaCon Plus is a water conditioning product designed to work in tough dry conditions found on the high plains. **AquaCon Plus** will substantially enhance the efficacy of any glyphosate application thereby accelerating kill times. Hard water has a tendency to "tie up" glyphosate molecules in the spray tank thus reducing the herbicide's ability to perform optimally. Use **AquaCon Plus** to get the job done right!

Recommended Foliar Rates

AquaCon Plus can be applied in a wide variety of herbicide applications and is a viable additive in pesticide applications where nitrogen is required in the additive section of the label.

Rate: 4 gallons per 100 gallons of spray solution

Agronomic Benefits

- Increased herbicide efficacy
- Reduced weed competition leads to higher crop yields
- Fewer re-sprays
- Quicker kill times
- Improve pesticide performance in dry conditions
