General Product Features

NTruZT is a proprietary starter fertilizer designed to stimulate early season plant growth and increase vigor. **NTruZT** contains phosphorus, zinc, and Transit. Transit is a breakthrough technology that increases nutrient uptake. **NTruZT** feeds more phosphorus and zinc into the plant which enables it to out yield and outperform other starter fertilizers.

Recommended Uses

Use as a starter fertilizer: broadcast, 2X2, strip-till, or in-furrow.

Rates

Corn in-furrow: 3-5 gallons per acre

Corn 2X2: 8-10 gallons per acre

Other Row Crops in-furrow: 2-4 gallons per acre

Other Row Crops 2X2: 8-10 gallons per acre

Alfalfa: 8-20 gallons per acre broadcast or banded

Small Grains: 2-4 gallons per acre at planting

Agronomic Benefits

- Improved early season growth
- Faster emergence
- Will not turn your starter black like humic acid based fertilizers
- Higher yields due to increased nutrient uptake and mobility in the plant
- Enables the plant to overcome environmental stresses such as cool soils
- Excellent choice for tough soil conditions such as high pH or high salts
- Increase yield and quality in alfalfa
