StressOut!

General Product Features

StressOut! is a proprietary foliar fertilizer designed to aid in the recovery process of a plant that has come under stress. **StressOut!** contains just the right balance of macro and micronutrients combined with superior chelating agents that activate the plant's defense mechanisms. **StressOut!** also contains slow-release nitrogen that improves crop safety while providing nitrogen for several weeks after application.

Recommended Uses

Foliar apply **StressOut!** following any stress event, such as hail or wind burn. **StressOut!** can be applied to most crops and is safe when added to insecticide and fungicide applications.

Rates

Corn: 1-5 gallons per application, with pesticides or alone up to R3

Dry Beans: 1-4 gallons per application, with pesticides or alone

Row Crops: 1-6 gallons per application, with pesticides or alone

Small Grains: 1-4 gallons per application, with pesticides or alone tiller to soft dough

Agronomic Benefits

- Plants are able to recover quickly after harmful stress events
- Provides the plant critical macro and micro nutrients essential for plant growth
- Improve crop quality and yields
- Research proven to increase yields with or without stress events
