Transit

General Product Features

Transit is an additive to soil-applied and foliar fertilizers that enhances nutrient uptake efficiency and increases crop yields. This proven fertilizer technology improves the performance of applied fertilizers and the utilization of residual soil nutrients in all crops. **Transit** is a carbon based molecule that acts as a bio-stimulant increasing nutrient uptake and translocation. It is classified as a plant growth regulator and can be mixed with all liquid fertilizers and pesticides.

Recommended Uses

Transit can be soil or foliar applied to all crops. Centennial Ag Supply Co.'s research has shown that optimum timings are at planting in starters and foliar applied throughout the growing season with macro or micro nutrients.

****Transit** can be found in other Fluid-Gro products: KBoost, FlashGuard, NTruZt, NTruZt Plus, and Micro LS.

Rates

Row Crops:

- 8-12 ounces per acre at planting with 2X2 starter
- 6-8 ounces per acre with in-furrow starter
- 6-12 ounces per acre foliar applied with fertilizers and pesticides

Small Grains:

- 8-12 ounces per acre with fall starter
- 6-12 ounces per acre at spring top-dress

Agronomic Benefits

- Enhanced root development
- Better nutrient uptake and mobility in the plant
- Increased early season growth and seedling vigor
- Higher crop yields and quality
- Improves stress tolerance and plant health
- Lower use rates than humic and fulvic acids
